

ELECTRONIC DREAMS

PRESENTS

REWINNED

THANK YOU FOR BOOKING ECLECTIC DREAMS

We are thrilled to partner with you for your upcoming event. Our core objective is simple: to deliver a flawless, high-energy retro experience that leaves your guests raving and your dance floor packed from the first note to the final encore.

To ensure everything runs seamlessly from initial logistics to the final load-out, we have compiled this comprehensive Media Pack & Production Rider.

How to Use This Pack: Within this document, you will find our promotional assets, technical specifications, stage plots, schedule breakdowns, and compliance documentation. Please distribute the relevant sections to your Marketing Team and House Sound/Lighting Engineers as soon as possible to ensure a frictionless event day.

THE REWIND EXPERIENCE

Eclectic Dreams is a premium, 7-piece concert production that meticulously resurrects the greatest soundtrack in modern musical history: the 1980s.

- **Studio-Grade Fidelity:** We recreate the complex synth textures, driving basslines, and soaring vocal harmonies of the era with absolute precision—100% live, with no shortcuts.
- **Concert-Grade Production:** We travel with a state-of-the-art, digital QSC PA system and a fully synchronised, automated visual lighting show that scales perfectly to fit premium wedding venues, corporate ballrooms, or party venues.
- **Professional Integrity:** We operate as a high-end corporate contractor. That means punctual load-ins, transparent communication, flexible scheduling, and strict adherence to venue policies (including decibel limiters).
- **Seamless Integration:** Our full technical rider and stage plot is designed to make set up a breeze for venues who are providing their own front of house systems and lighting.

DRIVEN BY FOOTBALL, RETAINED BY EXPERIENCE

When you book a 7-piece premium act, you aren't just buying entertainment; you are investing in a crowd-pulling asset designed to maximise your venue's secondary spend (bar, hospitality and catering).

- **The Power of the 80s Demographic:** The music of the 1980s cross-generates massive appeal, heavily targeting the 35–60 demographic. This audience represents the highest disposable income sector for ticket sales, premium bar menus, and corporate hospitality packages.
- **Extended Dwell Time (Bar Spend):** Our show—The Rewind Experience—is structured as a high-energy narrative, not a standard cover set. By building momentum intentionally and utilising automated playlisting during intervals, we eliminate the "set-break exodus." We keep patrons in the room, dancing, and buying drinks for the entire duration of the night.
- **Co-Marketing Partnership:** We don't just show up and play. For ticketed and public events, Eclectic Dreams deploys our own digital marketing assets. We actively co-promote your event via our website, email databases and targeted social media channels to help drive advance ticket sales and build local momentum.

THE SHOW EXPERIENCE & DAY PLANNING

Timeline & Operational Efficiency

We understand that event timelines can be fluid. Eclectic Dreams operates with absolute military precision to ensure we stay on schedule, meaning your event coordinators can focus entirely on the guests. Below is our standard operational timeline, which can be adapted to fit your specific itinerary.

Phase	Duration	Description
1. Load-In & Build	180 Mins	Secure access to the performance area, load in staging, audio, backline and automated lighting.
2. Soundcheck	40 Mins	A controlled, professional line-check and full-band soundcheck to optimise acoustics for the room.
3. Changer & Prep	30 Mins	Band changes into formal show attire; background/dinner music active via PA.
4. Live Set 1	60 Mins	<i>The Rewind Experience</i> launches. High-impact, recognisable 80s anthems to build the dance floor.
5. Interval	30 Mins	Live performance pauses. Custom-curated 80s playlist runs seamlessly via our digital desk.
6. Live Set 2	60 Mins + Encore	The high-energy finale. Peak dancefloor anthems culminating in a massive crowd encore.
7. Load-Out	90 Mins	Efficient strike of all gear, returning the performance space cleanly back to the venue.

PRODUCTION & PROMOTIONAL ASSETS

For Marketing & Event Promotion

To ensure maximum turnout and engagement, our marketing assets are free to use across your print, digital, and social media channels. Please direct your marketing and graphics teams to the assets below.

- Official Promo Reel (Video): Our flagship 2.5-minute promotional video showcases our live energy, high-end production value, and audience engagement.
 - Link: <https://www.youtube.com/watch?v=Y1CJgMHe2QU>
 - Tip for Web Developers: This video can be embedded directly onto your event page above the fold to drive immediate ticket conversions.
- High-Resolution Photography Hub: Access our shared media drive containing high-res promotional imagery of the 7-piece lineup, action live shots, and transparent .png brand logos for easy inclusion on your custom graphics.
- Pre-Made Poster & Flyer Templates: We supply downloadable, high-resolution A4/A3 poster and social media templates with a blank footer space specifically left open for your venue branding, ticket pricing, and event dates.

Short Blurb (For Social Media & Quick Listings — 50 Words)

Get ready to step back in time with Eclectic Dreams: The Rewind Experience. This premium, 7-piece concert production meticulously resurrects the ultimate 1980s soundtrack, live. From synth-pop masterpieces to stadium rock anthems, prepare for a high-energy, nostalgic voyage. Don't miss the ultimate 80s party!

Full Press Release / Event Description (For Websites & Programs)

Dust off the neon and prepare for the ultimate retro flashback. Eclectic Dreams brings their critically acclaimed show, The Rewind Experience, to {Venue} for a spectacular, high-octane celebration of the 1980s.

Eclectic Dreams is a premium, 7-piece concert production that meticulously crafts the complex synthesizer soundscapes, driving basslines, and soaring multi-part vocal harmonies that defined a generation. Delivering iconic tracks from artists like Eurythmics, Human League, Aha and many, many more, the show is a masterclass in sonic nostalgia.

Backed by a concert-grade audio setup and a synchronized digital light show. Whether you lived through the decade or just love the music, pull on your dancing shoes and get ready to experience the 80s exactly as you remember them.

TECHNICAL RIDER & STAGE PLOT

For House Engineers & Production Managers

Below you will find the complete technical specifications and stage layout for Eclectic Dreams. As a 7-piece lineup, we take great pride in maintaining a highly disciplined, efficient, and clean stage footprint.

Our setup is engineered for minimal sonic spill and maximum front-of-house (FOH) control:

- **Self-Contained IEM Infrastructure:** We run an entirely self-contained digital In-Ear Monitor (IEM) rack split. This means our monitor mixes are completely managed by us on stage, requiring zero floor wedges. This drastically reduces stage volume, eliminates feedback risks, and gives the house FOH engineer total, uncompromised control over the main room mix.
- **Silent Backline Capabilities:** Our guitar and bass setups utilize advanced digital modeling running direct (DI) to the board. Without loud acoustic amplifiers blaring on stage, we ensure a pristine, studio-quality feed straight to your system—making us incredibly adaptable to theatres, acoustic-sensitive spaces, and venues with strict decibel limiters.
- **Lighting Integration:** For venues utilising our self-contained production, our synchronized, automated visual lighting show runs on a compact footprint. For venues with house lighting rigs, our production team can provide a pre-programmed DMX midi map, or work directly with your house LX engineer to complement the venue's infrastructure.

Production Note: Please review the channel lists, power specifications and grid layouts on the following pages. If you have any questions regarding routing, microphone changes or wireless frequencies, please contact our Production Manager - Lee Matcheswala, directly ahead of the event date.

LOGISTICS, COMPLIANCE & SAFETY

Absolute Peace of Mind for Venue Management

We treat the operational safety and legal compliance of our performances with the same level of precision as our live sound. Eclectic Dreams operates as a fully insured, risk-assessed commercial entity. We hold all necessary certifications required to perform at premium corporate spaces, historic council buildings, theatres, and high-end wedding venues.

- **£5,000,000 Public Liability Insurance (PLI):** Our performance, crew, and equipment are fully backed by a comprehensive £5M PLI policy. This protects the venue, your staff, and your guests against any unforeseen operational incidents.
- **100% Certified PAT Tested Equipment:** Every single piece of electrical equipment we bring onto your premises—from our digital synth rigs to our extension cables and digital PA—undergoes strict annual Portable Appliance Testing (PAT). All items carry up-to-date validation pass labels.
- **Proactive Sound Level & Decibel Limiter Management:** We are fully aware that many premium venues and historic properties operate under strict local authority sound constraints or active hardware decibel limiters. Because we utilize a silent stage setup (In-Ear Monitors instead of loud stage wedges, and direct digital guitar feeds instead of blaring amplifiers), our master volume is incredibly controllable. We can easily adapt to sound limiters without compromising the energy or sonic fidelity of the show.

Documentation Access

Digital copies of our current PLI Certificate, PAT Testing Logs, and PII Certificates are available on request for verification. Please contact our booking coordinator, Bex Lovenbury, if your venue's administration team requires these files forwarded ahead of our arrival.
